“LUX-TSI announces strengthening of long-term collaboration with British Standards Institution (BSI) in the Lighting Sector”

LUX-TSI and the BSI Group (British Standards Institution) announce a strengthening of their long-term collaboration in the Lighting Sector by announcing that LUX-TSI has become a Platinum Member of the BSI Associate Consultant Programme which will allow customers to benefit from continued investment in technical expertise in LED Lighting technology and compliance services. This adds to the collaboration already established with the approval of LUX-TSI as a BSI associate laboratory in 2015, covering the lighting and road traffic equipment markets, both of which are undergoing transformation with the introduction of LEDs.

The agreement reflects the commitment of LUX-TSI, an LED test and compliance expert, to provide UK lighting manufacturers with the confidence enabled by a trusted end to end service for compliance of products through the combination of LUX-TSI and BSI offerings. We are proud to be supporting the British Standards Institution Kitemark™, the world-wide symbol demonstrating high levels of quality and safety of electrical and other products.

Dr Gareth Jones, CEO of LUX-TSI commented “This agreement further reinforces the position of LUX-TSI as the leading trusted provider of technical consulting, testing and compliance management services in partnership with BSI certification activities within the lighting industry and we are proud to continue to be associated with BSI to enable the sector to prosper and growth confidence in the UK and international markets. Our approach to global market access can only be effective with the global support from world leading certification providers like BSI.”

Greg Childs, Certification Team Manager from the UK standards organization concluded, “With this agreement and relationship, LUX-TSI continues to be a strong partner and continues to meet the exacting standards required by BSI for the carefully selected organizations that we work with. The enlarging of our relationship will mean we can now have a unique trusted approach in offering testing and certification services to the lighting industry including the prestigious BSI Kitemark and global market access coverage.”

For further information, please contact Dr Gareth Jones by calling +44 (0)1656 864618 or emailing gjones@lux-tsi.com. We are always happy to help where we can.”

Best regards,

Dr Gareth Jones
